PERSONAL PROJECTS

Face Detection Brain
- Fun Project where at Sign In page user registers with email and is directed to homepage. User adds a JPG photo in the submission box and App will detect the face in the photo. Count will increment at every detection of the face.
- https://facerecognitionbrain-karanpree.herokuapp.com/

Robofriends
- Robofriends is a fun app made using React. If you type something in search box, the app will filter out the robots that has the same letters in the name.
